

THE FREE KIT FROM THE REEL

The Reel Idea Machine

A free Claude skill that turns your niche into 30 scored, ready-to-film reel ideas. Plus the hook bank, the scoring sheet and a 30-day calendar.

START HERE

What's inside

You don't run out of ideas because you're not creative. You run out because you're starting from a blank screen every morning. This kit gives you a machine to start from instead.

01
The skill file

Install once in Claude. Ask "give me reel ideas" and it runs the full machine. **Page 4**

02
The 7 idea engines

The seven angles every good reel comes from, with examples. **Page 5**

03
Hook bank

8 hook formulas and 40 fill-in-the-blank hooks you can use today. **Page 6**

04
Scoring sheet

The 10-point test. Anything under 7 goes in the bin. **Page 7**

05
Prompt pack

10 copy-paste prompts for daily ideas, remixes, series and more. **Page 8**

06
30-day calendar

A filled example and a blank planner to print. **Pages 9–10**

No Claude? Every part still works. Copy the skill text on page 11 into any AI chat as your first message, then ask for ideas.

HOW IT WORKS

One machine, four steps

Same thing you saw in the reel. Your info goes in the top, ideas come out the bottom, and weak ones never reach you.

1. **It learns your niche**

   On the first run it asks 6 quick questions: niche, audience, goal, formats, your last 10 posts, and tone. It saves the answers to a profile file, so you only answer once.

2. **It runs 7 idea engines**

   Myths, mistakes, versus, stories, numbers, tools and hot takes. That gives at least 21 raw ideas, all specific to your niche, none repeating your last posts.

3. **Every hook gets scored**

   Each idea gets a spoken hook, an on-screen hook, and a score out of 10 across 5 checks. Anything under 7 goes straight in the bin.

4. **You get a ready-to-film list**

   Ideas sorted by score, each with a 3-beat outline, caption first line, CTA and a top pick for today. Everything is logged so it never repeats an idea.

What one idea looks like

Your client WhatsApp is eating 6 hours a week 9/10

Engine: Numbers · Format: Faceless screen rec · 30s

Hook (spoken): "I tracked every client WhatsApp for a week. It cost me 6 hours."

Hook (on-screen): "6 HOURS. GONE."

Beat 1: Screen-time screenshot, number circled · **Beat 2:** The 3 message types eating it · **Beat 3:** The one auto-reply that fixed it

CTA: Comment REPLY for the template

INSTALL · 2 MINUTES

Set it up

You got a file called **reel-idea-machine.zip** in your DMs. Pick where you use Claude.

Option A: Claude app or claude.ai (any plan, including Free)

1. Open **Settings** → **Capabilities** and turn on **Code execution and file creation**. Skills need it.
2. Go to **Customize** → **Skills**.
3. Click **+**, then **+ Create skill**, then **Upload a skill**.
4. Upload **reel-idea-machine.zip**. Don't unzip it.
5. Make sure the toggle next to it is on.

On a Team or Enterprise plan, your workspace owner has to allow skills first.

Option B: Claude Code (terminal)

Unzip it into your skills folder:

```
mkdir -p ~/.claude/skills
unzip reel-idea-machine.zip -d ~/.claude/skills/
```

Restart Claude Code. The skill loads on its own when you ask for ideas.

Option C: ChatGPT, Gemini or any other AI

Copy the full skill text from **page 11**, paste it as your first message, and add: *"Follow these instructions for this whole chat."*

Your first run: type exactly this

```
Give me 30 reel ideas for this month.
```

It'll ask you 6 questions first. Answer them properly: the more specific you are about your audience, the better every idea gets.

THE 7 IDEA ENGINES

Where every good reel comes from

Stuck even without AI? Pick one engine, fill in your niche, and you have a reel.

1 · MYTHS
A belief your audience holds that's wrong.
"Posting daily is killing your reach. Here's what the data says."

2 · MISTAKES
A common error and the fix.
"3 mistakes that make your reels look cheap (and the 10-second fixes)."

3 · VERSUS
Two options and a clear verdict.
"CapCut vs Premiere for reels. I edited the same video in both."

4 · STORIES
A real story with a turn in the middle.
"A client almost fired me over one caption. Then this happened."

5 · NUMBERS
Data, costs, time saved, before and after.
"This one template cut my editing time from 4 hours to 20 minutes."

6 · TOOLS
A tool, prompt, template or workflow.
"Free AI tool that writes your captions in your own voice."

7 · HOT TAKES
A contrarian opinion you can actually defend.
"Unpopular opinion: trending audio is making your account forgettable."

Rotation rule: never use the same engine two days in a row. Your audience feels variety even when the topic stays the same.

HOOK BANK

8 formulas, 40 hooks

The first 2 seconds decide everything. Swap the [brackets] for your niche.

FORMULA	FILL-IN HOOKS
Callout	If you [run a small agency], stop scrolling. · If your reels get under [500] views, watch this. · This is for every [creator] who [edits at 2am]. · [Freelancers], this one's for you. · If you still [write captions yourself], I'm sorry.
Negative	Stop [posting at 9pm]. Do this instead. · Never [start a reel with "Hey guys"]. · Delete [this app] today. · You're [editing] wrong. · Quit [chasing trends] for one week.
Number + result	[3] [prompts] that [write a week of posts]. · [5] [tools] I'd pay for, but they're free. · [1] [setting] that doubled my [reach]. · [7] [hooks] that never fail. · [10] seconds to [fix your thumbnail].
Curiosity gap	Nobody talks about why [reels die at 300 views]. · The real reason [your client ghosted]. · What [top creators] never show you. · This is why [your engagement dropped]. · I found out why [my best reel flopped].
Proof first	This [reel] got [2M views]. Here's the script. · I made [₹50k] from [one post]. · This [prompt] wrote [30 captions] in [1 minute]. · [Day 30] of [posting AI reels]. · This [edit] took me [4 minutes].
Versus	[ChatGPT] vs [Claude] for [scripts]. · [₹500] vs [₹50,000] [logo]. · [Phone] vs [camera] reels. · [Hiring an editor] vs [AI]. · [Morning] vs [night] posting.
Confession	I wasted [₹20k] on [ads] so you don't have to. · I [posted daily for 90 days]. Big mistake. · I was [undercharging] for [2 years]. · I [copied a viral reel] and it flopped. · I almost [quit] last month.
Challenge	Bet you can't [name 3 AI video tools]. · Try [this prompt] before you [post today]. · Watch this without [skipping]. · Guess which one is [AI]. · Can you [spot the mistake]?

Always pair it with an on-screen hook of 3–6 words. Most people watch with the sound off.

THE 10-POINT TEST

Score it before you film it

Five checks, 0–2 points each. Be honest: a 6 you film is a day you lose.

CHECK	0 POINTS	1 POINT	2 POINTS
Hook strength	Generic opener	Interesting, but slow	Stops the scroll in under 2s
Specificity	"Tips for creators"	Clear topic, no detail	Real number, name or situation
Payoff	No clear ending	Small takeaway	Clear result, answer or laugh
Shareability	Nobody would send it	Maybe a save	"Send this to your editor"
Doability	Needs gear you don't have	Needs prep	You can film it today

9–10

Film today. Make it your top pick and post it in your best slot.

7–8

Keep it. It goes in the calendar. Can you make the hook 1 point stronger?

0–6

Bin it. Or rewrite it with a different engine and score again.

Quick score card

Idea: _____

☐ Hook ___/2 ☐ Specific ___/2 ☐ Payoff ___/2 ☐ Share ___/2 ☐ Doable ___/2 **Total ___/10**

PROMPT PACK

10 prompts to copy and paste

Use these with the skill installed. Without it, paste the page 11 text first.

WHEN	PROMPT
Every morning	`Give me today's 5 reel ideas and your top pick.`
Monthly plan	`Give me 30 reel ideas as a 30-day calendar. Rotate the engines.`
Just hooks	`Hooks for: [topic]. Use all 8 formulas and score them.`
Saw a viral reel	`Remix this for my niche, 5 original angles, don't copy the script: [paste caption or describe it]`
Make a series	`Turn my best idea into a 5-part series with a cliffhanger at the end of each part.`
One engine only	`Run only the HOT TAKES engine. 10 ideas, scored.`
Learn from results	`These did well: [list]. These flopped: [list]. Update my profile and weight future ideas toward what worked.`
Comment-to-DM reel	`Give me 5 ideas where I give away a free resource and ask people to comment a keyword.`
Full script	`Write the full 30-second script for idea #[n]: spoken lines, on-screen text and shot list.`
Rescue a 6	`This idea scored 6: [idea]. Rewrite it through 3 different engines and rescore.`

EXAMPLE OUTPUT

A filled week

Example niche: **"AI tools for small agency owners."** This is what one week of the 30-day calendar looks like.

DAY	TITLE	ENGINE	HOOK	SCORE
1	Client WhatsApp eats 6 hrs/week	Numbers	"I tracked every client message for a week."	9
2	"AI will replace agencies" is wrong	Myths	"AI won't replace your agency. This will."	8
3	Free caption AI in your voice	Tools	"This free tool writes captions like you."	9
4	The proposal that lost a ₹2L client	Stories	"One line in my proposal cost me ₹2 lakh."	8
5	Canva vs AI for client posts	Versus	"Canva vs AI. Same brief, 10 minutes each."	8
6	3 onboarding mistakes	Mistakes	"Stop sending clients a Google Form."	7
7	Retainers are dead	Hot take	"Unpopular opinion: monthly retainers are dying."	8

Binned by the machine

5/10 · "Top 10 AI tools": too generic, nobody shares a list they've seen 100 times.
4/10 · "My agency journey": no hook and no payoff. Needs a single turning-point story.
6/10 · "How to use ChatGPT": not specific to agencies. Rewrite it as a client-brief use case.

FULL SKILL TEXT · 1/3

Copy this into any AI

This is the full **SKILL.md** from the zip. On ChatGPT or Gemini, paste all of it as your first message.

```
---
name: reel-idea-machine
description: Generates scored short-form video ideas (Reels, Shorts, TikTok) tailored to a creator's
niche, audience and past posts. Use when the user asks for reel ideas, content ideas, video ideas,
hooks, a content calendar, or says "I don't know what to post".
---

# Reel Idea Machine

You turn a creator's niche into a batch of ready-to-film short-video ideas. Each idea has a hook, a
format, a 3-beat outline and an honest score out of 10. You throw away weak ideas instead of padding
the list.

## Step 0: Load the creator profile

Look for a file named `creator-profile.md` in the current folder or project.

- **If the file exists:** read it and skip to Step 1.
- **If it doesn't exist:** ask these 6 questions in ONE message, then save the answers to `creator-
profile.md`.
  1. Niche, in one line (e.g. "AI tools for small agency owners")
  2. Who watches: age, job, and what they're struggling with
  3. What they should feel or do after watching (learn, laugh, buy, follow)
  4. Your format strengths: talking head, faceless, animation, screen recording, skits
  5. Paste your last 10 post captions or topics (or "new account")
  6. Language and tone (e.g. "English, casual, a bit savage")

If the user pasted analytics or their top posts, note which topics and hooks won. Weight future ideas
toward those patterns.

## Step 1: Run the 7 idea engines

Generate at least 3 raw ideas per engine (21+ total) before you filter anything.

| # | Engine | What it produces | Example pattern |
|---|---|---|---|
| 1 | MYTHS | Belief the audience holds that is wrong | "Stop doing X, it's killing your Y" |
| 2 | MISTAKES | Common error and the fix | "3 mistakes every new X makes" |
| 3 | VERSUS | Two options compared, with a verdict | "X vs Y: I tested both for 7 days" |
| 4 | STORIES | Personal or client story with a turn | "This client almost fired me, until..." |
| 5 | NUMBERS | Data, cost, time saved, before/after | "This cut my editing time from 4h to 20m" |
| 6 | TOOLS | A tool, prompt, template or workflow | "Free tool that does X in one click" |
| 7 | HOT TAKES | Contrarian opinion you can defend | "Unpopular opinion: X is overrated" |
```

Continued

```
Rules for raw ideas:
- Each one must be specific to the niche. "Productivity tips" fails. "How agency owners lose 6 hours a week to client WhatsApp" passes.
- Never repeat a topic from the last-10-posts list unless it's a clear sequel ("Part 2" or a new angle).
- Read `ideas-log.md` if it exists, and never re-pitch an idea logged there.

## Step 2: Write a hook for each idea

The hook is the first 1–2 seconds, under 12 words. Use one of these formulas:

1. **Callout:** "If you [specific situation], stop scrolling."
2. **Negative:** "Stop [common action]. Do this instead."
3. **Number + result:** "[Number] [thing] that [specific result]."
4. **Curiosity gap:** "Nobody talks about why [surprising fact]."
5. **Proof first:** "This [thing] got [result]. Here's how."
6. **Versus:** "[A] vs [B]. One clear winner."
7. **Confession:** "I wasted [time/money] on [thing] so you don't have to."
8. **Challenge:** "Bet you can't [task] without [thing]."

Also write the on-screen text hook: 3–6 words that work with the sound off.

## Step 3: Score every idea out of 10

Score honestly, 0–2 points per line:

- **Hook strength (0–2):** Would the target viewer stop scrolling in under 2 seconds?
- **Specificity (0–2):** Concrete numbers, names and situations, or vague?
- **Payoff (0–2):** Does the viewer get a clear result, answer or laugh by the end?
- **Shareability (0–2):** Would someone send it to a friend or save it?
- **Doability (0–2):** Can this creator film it today with their stated format?

**Keep only ideas scoring 7 or more.** Bin the rest, and show the binned ones as a single line each with the reason, so the user learns what makes ideas weak.

## Step 4: Output format

Give the kept ideas sorted by score, highest first. Use this exact format for each one:

```
[Score]/10 — [Working title]
Engine: [engine]   Format: [talking head / skit / faceless / screen rec]   Length: [15/30/45s]
Hook (spoken): "..."
Hook (on-screen): "..."
Beat 1 (0–3s): ...
Beat 2: ...
Beat 3: ...
Payoff / CTA: ...
Caption first line: ...
```
```

FULL SKILL TEXT · 3/3

Continued

```
Comment keyword (optional): ...
```

After the list, add:
- **Top pick for today:** one idea and a single sentence on why.
- **Binned:** one line per rejected idea with its score and reason.

Step 5: Log it

Append every kept idea's title and today's date to `ideas-log.md`, so future runs never repeat it. If the user tells you which ideas they filmed and how they performed, write that next to the idea. Use it to weight future engines.

Modes

- **"30 ideas" / "monthly":** run the engines 2x, keep the top 30, and arrange them into a 30-day calendar table (Day | Title | Engine | Hook). Rotate engines so no engine repeats on consecutive days.
- **"Daily" / "today":** produce 5 kept ideas plus the top pick only.
- **"Hooks for [topic]":** skip the engines and write 10 hooks for that topic using all 8 formulas, scored.
- **"Remix [link or caption]":** take a viral post the user shares and produce 5 original angles on it for their niche. Never copy its script.

Quality bar

- No generic advice. Every idea needs a real situation, number, tool or story.
- No clickbait the video can't pay off.
- Write hooks in the user's language and tone from the profile.
- If the niche is too broad to give specific ideas, say so and suggest 3 narrower sub-niches before generating anything.

ONE LAST THING

Ideas are the easy part now.

Pick the top idea, film it today, and come back tomorrow for the next one. Tell the machine what worked so every week gets sharper.
